# Biogas BRAZIL

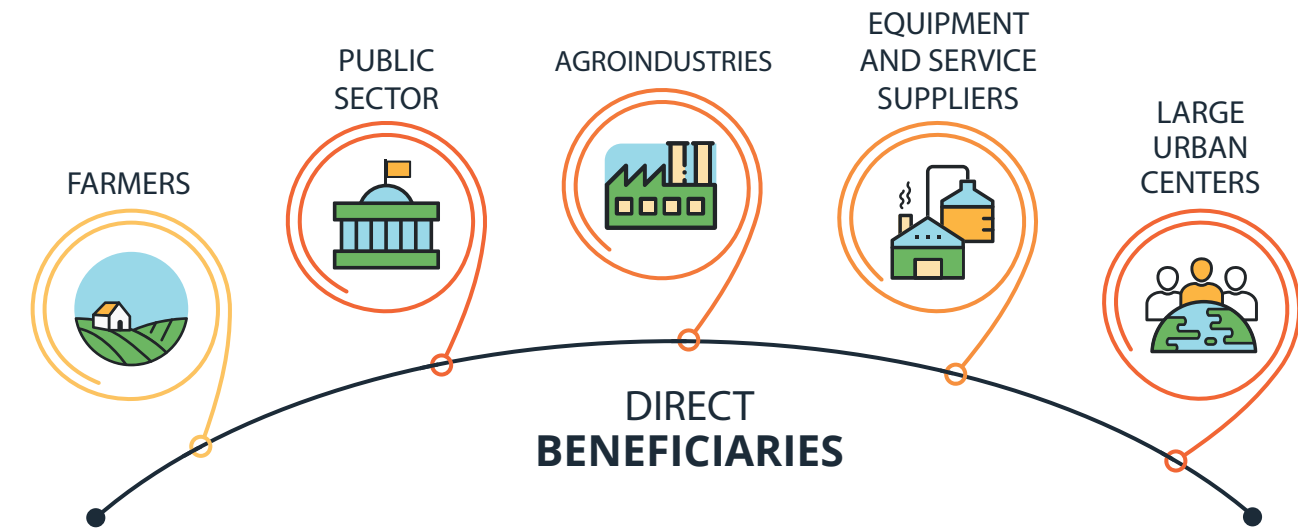

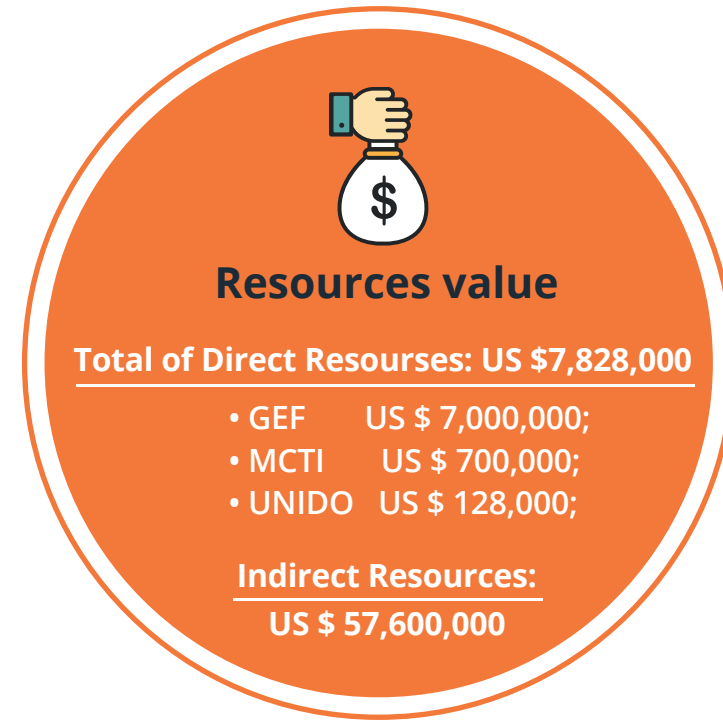

GEF Biogas Brazil project converges actions and investments from international organizations, private institutions, setorial entities and the Federal Government to diversify energy generation in the country through biogas production.

The initiative is financed by the Global Environment Facility (GEF), implemented in Brazil by the United Nations for Industrial Development Organization (UNIDO) and led by the Ministry of Science, Technology and Innovations (MCTI). The project's goal is to strengthen production chains, commercialization and technological innovation in the biogas and biomethane sector.

## GOAL

Provide technical support, strategic information and business models to convert organic waste into electric energy, thermal energy and renewable fuel through biogas and biomethan, diversifying energy generation in national territory.

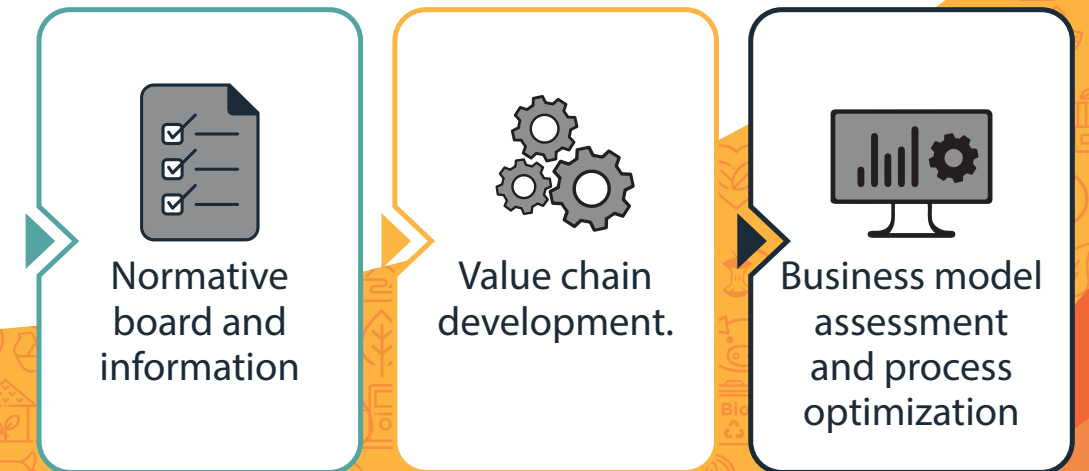

**120 million reais estimated in direct investments.**

## RESULTS

## PROJECT COMPONENTS

**Monitoring and control**
