

**YOUR ENERGY, SUSTAINABILITY, AND
DECARBONIZATION STRATEGIC PARTNER**

**WE ENVISION A WORLD WHERE SUSTAINABLE
PRACTICES AND INTEGRATED GREEN TECHNOLOGIES
REDUCE GREENHOUSE GAS EMISSIONS TO
NET ZERO BY 2050.**

**Stark Tech is a Market-Leading Technology Solutions
Provider of Building & Energy Applications.**

MARKET-LEADING TECHNOLOGY SOLUTIONS PROVIDER OF BUILDING & ENERGY APPLICATIONS

ENERGY EFFICIENCY SOLUTIONS

We are a total optimization provider that works with customers on their decarbonization roadmaps from inception through implementation of agreed upon Energy Conservation Measures. Our analytics platform then monitors the success of our services over time and supports risk management programs, labor planning, and provides dynamic commissioning of controlled assets.

MICROGRIDS, ENERGY STORAGE, & RENEWABLE NATURAL GAS

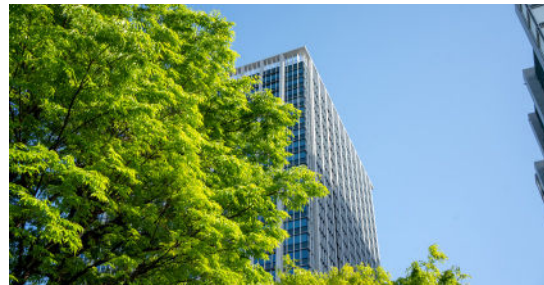

Our clean energy equipment solutions support project developers, owners / operators, and Engineering, Procurement and Construction firms (EPCs). Our team provides engineering services, manufactures equipment, and offers turnkey implementation of renewable projects across North America.

OPERATIONS & MAINTENANCE OPTIONS

Our service technicians are factory trained with decades of field experience; specializing in building controls, HVAC, generators, and boilers and combustion equipment.

Our Customers Get Full Access to Our Entire Team, including:

- ▲ Controls Experts
- ▲ Engineering Design Specialists
- ▲ Integration & Energy Experts
- ▲ Power Experts
- ▲ Mechanical & Electrical Engineers
- ▲ Service Technicians
- ▲ Certified Energy Consultants
- ▲ Project and Account Managers
- ▲ WELL-Building & LEED Certified Professionals

WE'VE GOT FACILITIES MANAGEMENT DOWN TO A SCIENCE

Our integrated team approach allows us to offer end-to-end solutions that provide visibility into operational efficiencies, cost control, and maximized energy savings.

TURNKEY PROJECT MANAGEMENT

- ▲ Project Management & Lifecycle Support
- ▲ Engineering & Procurement
- ▲ Commissioning & Testing
- ▲ Operations & Maintenance
- ▲ Energy Savings Programs

SMART BUILDING TECHNOLOGIES

- ▲ Building Automation
- ▲ Energy & Power Management
- ▲ Protective Systems
- ▲ Professional Audio / Visual
- ▲ 24/7 Service, Monitoring & Support

MECHANICAL & ELECTRICAL EQUIPMENT & SERVICE

- ▲ HVAC
- ▲ Boiler & Combustion
- ▲ Critical Power
- ▲ Data Center
- ▲ Cleanroom
- ▲ Parts Inventory

COMPREHENSIVE ENERGY SOLUTIONS

Our team of energy experts provide best-in-class clean tech equipment to accomplish carbon offsets and achieve net zero emissions. Our solutions control costs and maximize energy optimization.

RENEWABLE NATURAL GAS

- ▲ Landfill Operations
- ▲ Wastewater Treatment
- ▲ Biogas Compression
- ▲ Food Waste

BATTERY ENERGY STORAGE

- ▲ Microgrid on a Skid
- ▲ Product Selection
- ▲ Safe Chemistry
- ▲ Engineering Support

SOLAR DEVELOPMENT

- ▲ Utility-Scale
- ▲ Commercial Solar
- ▲ Solar Siting
- ▲ Community Solar

LEADING TECHNOLOGY, EQUIPMENT AND ENGINEERING SOLUTIONS

We provide customizable solutions and support services to advance energy efficiency and decarbonization goals.

MASTER SYSTEMS INTEGRATION

A multi-disciplined approach to smart building technology for the collection, analysis, and management of facility data to achieve total optimization.

HVAC, BOILERS, & CRITICAL POWER

Mechanical and electrical equipment offerings that are designed to boost efficiency and reliability with future-ready infrastructure.

RENEWABLE INTEGRATIONS

Full support from design and engineering to fabricating skidded equipment solutions. Turnkey project management of renewable projects across North America.

SERVICE SOLUTIONS

Enterprise Asset Management platform offering continuous commissioning of operating assets using automation, predictive analytics, and fault detection and diagnostics.

ENERGY MASTER PLANS

Energy master plans that pull data from multiple sources, including energy meters, building management systems, controls, & other mechanical & electrical equipment to benchmark performance.

PROJECT MANAGEMENT

End-to-end support includes design, engineering, equipment selection and sourcing, construction management, and commissioning.
